

INDOOR PAPER OVERVIEW 2009

CAD

Easy Print 888

90 g/m² treated inkjet paper
high whiteness, good line-sharpness

Print & Fold 889

90/120 g/m² treated inkjet paper
high whiteness, good line-sharpness, good drying time, improved colour density, basic water resistance

DT Plot 866

90/100 g/m² coated inkjet paper
high whiteness, good line-sharpness, high colour density, high universality, good water resistance, instant dry, immediate encapsulation of pigmented black (no abrasion)

Premium Plot 967

100 g/m² coated inkjet paper (special surface treatment)
high whiteness, good line-sharpness, high colour density, high universality, good water resistance, instant dry, immediate encapsulation of pigmented black (no abrasion), high scratch resistance, enhanced smoothness of surface

GRAPHIC ART

Swiss Matt 971

90/100/120/140/180 g/m² heavy-coated inkjet paper
suitable for dye, pigmented, solvent, eco-solvent and oil-based inks; enhanced smoothness, improved whiteness, excellent line-sharpness, high colour density, excellent universality, excellent water resistance, instant dry, no bleeding, high ink loads, good lamination properties

Swiss Matt Adhesive 972

140 g/m² heavy-coated inkjet paper with permanent self-adhesive reverse side (same top sheet as 971 Swiss Matt)
enhanced smoothness, improved whiteness, excellent line-sharpness, high colour density, excellent universality, excellent water resistance, instant dry, no bleeding, high ink loads, good lamination properties

Photo Matt 884

150/180 g/m² heavy-coated barrier inkjet paper
suitable for dye, pigmented, solvent, eco-solvent and oil-based inks; high whiteness, excellent line-sharpness, high colour density for photographic applications, excellent universality, excellent water resistance, instant dry, no wet cockling, highest ink loads, good lamination properties

PHOTO

Photo Gloss Solvent 894

220 g/m² specially coated glossy photo paper on PE-Base for all solvent inks
excellent whiteness, highest line sharpness, highest colour density, excellent universality, excellent water resistance, fast drying time, highest ink loads, good lamination properties

Photo Satin Solvent 895

220 g/m² specially coated satin photo paper on PE-Base for all solvent inks
excellent whiteness, highest line sharpness, highest colour density, excellent universality, excellent water resistance, fast drying time, highest ink loads, good lamination properties
